EU Work Authorisation: Requires employer-sponsored work permit for Spain

PROFESSIONAL SUMMARY

Microsoft 365 Solutions Architect with 15+ years of experience designing and delivering enterprise-grade platforms for UN agencies, global consultancies, and Fortune 500 clients. Specialised in SharePoint Online architecture, Power Platform governance, and Azure integration — leading cross-functional teams of up to 6 through full project lifecycles with budgets exceeding \$550K. Proven track record of driving digital transformation, reducing operational costs, and improving system performance by 50%+. Scrum Master with deep expertise in translating complex business requirements into scalable, secure, and future-proof technical solutions.

KEY ACHIEVEMENTS

- Nominated for Innovation Award at the United Nations for a Finance Application serving 400+ users across multiple agencies.
- Improved page load performance by 50%+ on a Microsoft internal intranet through global caching architecture.
- Led the migration of 1,000+ site collections (SharePoint 2013 → Online) for an entire UN organisation with zero data loss and remediations.
- Saved 10+ engineering hours/week by establishing CI/CD pipelines and automated deployment workflows.
- Managed \$550K+ project budgets, delivering solutions on time and within scope across 4 concurrent workstreams.

TECHNOLOGY & SKILLS

- **Cloud & Platforms:** Microsoft Azure (Functions, Logic Apps, App Services, Key Vault), Microsoft 365, SharePoint Online/On-Premises, Power Platform (Power Apps, Power Automate, Copilot Studio, AI Builder)
- **Architecture & Security:** Solution Architecture, Microsoft Graph API, Microsoft Entra ID, Zero Trust, Conditional Access, Content Security Policy (CSP), Sensitivity Labels, Information Architecture & Taxonomy
- **Development:** C# / ASP.NET / MVC, JavaScript / TypeScript, React / SPFx, Python, PowerShell, PnP PowerShell, HTML5 / CSS3
- **Integration & Data:** RESTful API Design, Microsoft Graph, Web Services, SQL Server, SharePoint Premium (Syntex), Dataverse
- **DevOps & Tooling:** Azure DevOps (CI/CD Pipelines), Bicep / ARM Templates, Git / Bitbucket, Jira, Sharegate (Migration)
- **Leadership:** Scrum Master (Agile/SAFe), Solution Architecture Advisory, Cross-Functional Team Leadership (up to 6), Stakeholder Management, Risk Assessment & Governance, ALM & Release Management

WORK EXPERIENCE

Solutions Architect

UNOPS • January 2026 – Present • Geneva, Switzerland (Remote from Valencia)

Serving UN clients (MRMS platform) on financial and budget applications for 400+ end-users across multiple agencies. Leading a team of 6 (4 developers, QA, UI/UX) with a project budget of ~\$550K.

- Overhauled solution architecture to enforce modern security standards — migrated authentication to Microsoft Entra ID, implemented CSP headers, and integrated Azure Key Vault with certificate-based auth, reducing security vulnerabilities by 80%.
- Deployed Azure Functions for scalable serverless operations, resolving performance bottlenecks and delivering 40% improvement in API response times.
- Restructured Power Platform environments with managed solutions and proper ALM governance, enabling reliable multi-environment deployment pipelines across Dev/Test/Prod.
- Optimised Power Automate flows and Canvas Apps — improving reliability and maintainability while automating redundant processes using AI Builder capabilities.
- Planned UI/UX modernisation roadmap leveraging Microsoft Graph and Copilot Studio integration for next-generation user experiences.
- Established CI/CD best practices using Azure DevOps, saving 10+ hours/week in manual deployment effort and reducing release risk.
- Led sprint planning, backlog refinement, and retrospectives as Scrum Master, ensuring on-time delivery of quarterly milestones.
- Evaluated emerging technologies (Copilot for M365, SharePoint Premium) and recommended adoption strategies to keep the platform future-proof.

Technical Architect & Scrum Master

Larsen & Toubro Infotech (LTIMindtree) • March 2017 – December 2025 • Valencia, Spain

Clients: UNICC, WHO, UNCTAD | Delivered 7+ mission-critical applications for UN agencies.

- Spearheaded design and delivery of 7+ enterprise applications for UN agencies (UNICC, WHO, UNCTAD), leading teams through full project lifecycles from requirements to production support.
- Architected scalable solutions using Microsoft 365, SharePoint Online, Power Platform, Azure Functions, and Logic Apps — aligning technical strategies with organisational goals.
- Built a Finance Application on SharePoint Online with SPFx and Power Automate serving 400+ users — nominated for UN Innovation Award for its impact on efficiency and collaboration.
- Led the migration of 1,000+ site collections from SharePoint 2013 to SharePoint Online using Sharegate, completing on schedule with zero data loss and minimal user disruption.
- Delivered a WHO mobile application leveraging AWS cloud for authentication and secure public access.
- Developed custom integration tools including a Lotus Notes migration utility, and built Microsoft Graph-based solutions for cross-platform data interoperability.
- Facilitated Agile ceremonies as Scrum Master — sprint planning, daily standups, reviews, and retrospectives — driving a culture of continuous improvement across distributed teams.
- Automated CI/CD pipelines using Azure DevOps, reducing deployment time from hours to minutes and ensuring reliable, repeatable releases.

Technical Lead & Senior Developer

Capgemini • March 2011 – March 2017 • Mumbai, India

Clients: Nestlé, Swiss financial institutions | Progressed from Senior Developer to Technical Lead.

- Led a Swiss client project, developing ASP.NET and JavaScript widgets integrated with external databases via web services, serving 200+ internal users.
- Built a unified SSO authentication system enabling single sign-on across multiple sites for internal and external users, reducing login friction by 60%.
- Developed a Nestlé custom site using .NET with SQL backend and RESTful APIs, enhancing data accessibility and user experience for 500+ employees.

- Implemented global caching on a Microsoft internal intranet, reducing page load time by 50% — adopted as a best-practice pattern across the division.
- Managed data migration from Lotus Notes to SharePoint file shares using Quest tools, ensuring secure and accurate transfer of 10,000+ documents.
- Improved application performance through UI optimisation, request throttling, and backend query tuning.

SharePoint Consultant

Wipro (Deployed at Microsoft) • August 2006 – March 2011 • Mumbai, India

- Supported Microsoft clients with SharePoint Farm administration, server recovery, and infrastructure enhancements across multi-server topologies.
- Automated site provisioning, SQL backups, and file-share maintenance using PowerShell scripts, reducing manual operations by 70%.
- Performed SQL mirroring, failover clustering, and domain infrastructure setup including load balancers and Web Front Ends.

KEY PROJECTS

MRMS Finance Application — United Nations

SharePoint Online • SPFx • Power Automate • Microsoft Graph

Designed and built a mission-critical Finance Application serving 400+ users across UN agencies. Implemented complex budget calculations, automated document generation, and role-based security. Nominated for UN Innovation Award.

Organisation-Wide SharePoint Migration — WHO

SharePoint 2013 → SharePoint Online • Sharegate • PowerShell

Led end-to-end migration of 1,000+ site collections with zero data loss. Planned migration waves, conducted risk assessments, trained 50+ site owners, and delivered on a 6-month timeline.

Modern Intranet Portal — UNCTAD

SharePoint Online • SPFx • Responsive Design

Architected and delivered a visually engaging Intranet Portal replacing a legacy system, with responsive design for 1,000+ staff accessing from any device.

Global Caching Architecture — Microsoft Internal

ASP.NET • Performance Engineering • Caching Patterns

Implemented a global caching layer on Microsoft's internal intranet, reducing page load times by 50%+. Pattern was adopted as divisional best practice.

EDUCATION & CERTIFICATIONS

- Bachelor of Engineering — Mumbai University, India (2006)
- Core Solutions of Microsoft SharePoint Server — 70-331 (Microsoft)
- Microsoft Power Platform Fundamentals — PL-900 (Microsoft)

LANGUAGES

- English — Fluent (professional working language)
- Spanish — A1 (beginner, actively learning)
